Professional Summary

Machine Learning Engineer and AI Instructor with practical experience in developing, deploying, and teaching Artificial Intelligence solutions.

Currently working as a **Machine Learning Instructor** at **Najot Ta'lim Khorezm Branch** since June 2026.

Experienced in Machine Learning, Deep Learning, Computer Vision, REST API development, and AI model deployment.

Strong background in Python, Scikit-learn, PyTorch, TensorFlow, FastAPI, Docker, Git, and GitHub.

Passionate about solving real-world problems through Artificial Intelligence, building production-ready AI applications, and mentoring future AI engineers.

Professional Experience

Machine Learning Instructor

June 2026 – Present

Najot Ta'lim, Khorezm Branch

- Teach Python, Machine Learning, Deep Learning, and Computer Vision.
- Mentor students through real-world AI projects.
- Deliver FastAPI, Docker, Git, and GitHub training.
- Develop project-based learning materials and practical assignments.

Education

Bachelor of Engineering

2013–2017

Tashkent State Technical University, Uzbekistan

Core Skills

Python	SQL	Machine Learning	Deep Learning	Computer Vision	FastAPI
Docker	Git	GitHub	PyTorch	TensorFlow	OpenCV

Technical Skills

Programming	Python, SQL
Machine Learning	Scikit-learn, XGBoost, CatBoost, LightGBM, Regression, Classification, Clustering
Deep Learning	PyTorch, TensorFlow, Keras, Transfer Learning, CNN
Computer Vision	OpenCV, YOLO, Object Detection, Semantic Segmentation, OCR
Deployment	FastAPI, Docker, Git, GitHub, REST API

Machine Learning Projects

Cars Kilometer Prediction [GitHub](#)

Machine Learning regression model for predicting vehicle mileage using feature engineering and ensemble learning.

Hotel Booking Cancellation Prediction [GitHub](#)

Classification model for predicting hotel booking cancellations using feature engineering and FastAPI deployment.

YouTube Video Categorization [GitHub](#)

Natural Language Processing project for automatic YouTube video category prediction.

Employee Attrition Prediction [GitHub](#)

Machine Learning classification project for predicting employee attrition using ensemble models and FastAPI.

Deep Learning Projects

Image Classification [GitHub](#)

Deep Learning image classification using PyTorch and Convolutional Neural Networks (CNNs).

Video Classification [GitHub](#)

Deep Learning video classification and action recognition using neural network architectures.

Computer Vision Projects

Receipt OCR [GitHub](#)

OCR system for extracting receipt information using OpenCV and EasyOCR.

Ship & Truck Detection [GitHub](#)

YOLO-based object detection system for automatic ship and truck detection.

Semantic Segmentation [GitHub](#)

Semantic segmentation project using PyTorch for pixel-level image understanding and scene segmentation.

Languages

Uzbek (Native) ■ **English** (Professional Working Proficiency) ■ **Russian** (Intermediate)
